How to beat plague inc prion mega brutal

Our Plague Inc. Prion Guide will walk you through exactly how-to beat the prion plague on normal. This can be slightly difficult, especially because countries seem to have an easier time developing a cure for the prion. However, our guide will get you through it and have you on the way to victory. How-to Beat Prion in Plague Inc. Step 0: Devolve Any Symptoms You Gain Sometimes you will gain symptoms as you play the game, you will want to devolve these so they don't make the prion as obvious to find. We're not looking to kill people right away, the idea is to infect everyone first, and then ramp up the symptoms. A bit of a tip is to not close the pop up, and immediately jump to the Symptoms menu and devolve it. The popup pauses the game, so there's no time for the symptom to have been active. Step 1: Start Your Prion in India To start us off, we're going to need to place our future deadly prion into India! Step 2: Upgrade Transmissions: Air 1 & Water 1. Upgrade Ability: Cold Resistance 1 You'll need to save up about 30 or so DNA points to unlock all of these. Once you have the points, you can start upgrading your ability to transmit the prion to people. We'll also want to start up our resistance to cold, so upgrade to Cold Resistance 1 in the Ability section. Step 3: Upgrade Ability: Heat Resistance 1 & Neural Atrophy 1 You'll need about 15 - 20 DNA Points to upgrade these abilities. Heat Resistance will give us an easier time spreading in the hotter areas on the map, and Neural Atrophy will help make noticing the disease more difficult. Step 4: Upgrade Ability: Drug Resistance 1 If we want to start infecting more of the richer nations, then we're going to need upgrade our Drug Resistance! You'll need about 15 points or so to get this ability. At around this point, it's likely your prion will start mutating some symptoms. Be sure to devolve them as soon as possible, or countries might start looking for a cure! Step 5: Upgrade Transmissions: Air 2 & Water 2 You'll need about 35 DNA Points for these both to be upgraded. We're looking to spread the prion further now, these will help with this. Step 6: Upgrade Ability: Cold Resistance 2 Time to get us into the colder climates with this upgrade. It's going to cost us about 15 or so DNA points, so make sure to save up and grab this. Step 7: Wait... We should pretty much be on our way to infecting the whole planet at this point. Just hold onto your DNA Points, we're going to be dumping a lot of them once we get everyone inflicted with our prion. Once you get the "There are no health people left in the world" message... Step 9: Upgrade Symptoms: Coughing, Sneezing, Immune Suppression, Total Orange Failure, & Coma Time to turn the prion into a killer. We'll want to do this all at once, you should have enough DNA Points to upgrade all of the listed options, but if not you can devolve the transmission abilities for some extra points. Step 10: Watch the Cure - Upgrade Ability: Genetic Hardening 1, Use Genetic ReShuffles People will start dying at an alarming rate, so the cure is going to start being researched. Make sure to start popping all of the blue bubbles, and at around 70% you can do a Genetic ReShuffle to drop the cure back down. At 80% you can go ahead and do another Genetic ReShuffle. Finally, you can do another one at 90% but it's likely that you've killed enough people to outrun the cure at this point! Follow us on Twitter and Facebook to get updates on your favorite games! Plague Inc.: Evolved is a real-time strategy simulation game created by Ndemic Creations and is defined by its two main modes. In the main mode, players have to develop a plague that will infect and wipe out humanity before a cure is developed. They can choose from bacteria, virus, fungal, parasite, prion, nano-virus, or even a bio-weapon. On the opposite end is the cure mode, where players have to research and put together a vaccine before the pathogen wipes out the planet or they're thrown out of power. With Plague Inc.: Evolved being released on consoles in 2019, it has evolved and it's now much more than a simple mobile game, Plague Inc.: Evolved has four difficulties with three being the main ones used. Casual, for players just starting out or wanting to complete a quick game or two, normal, for experienced players wanting a bit of a challenge, and brutal, for veteran players looking to up their game. However, the fourth difficulty is mega brutal. In mega brutal difficulty, doctors invest in research, genetic drifts impact evolution, and the population has random checkups. This means, in the main mode, that the pathogen can be discovered very early on if the player isn't careful. In Cure mode, non-compliance runs rampant and your authority drains rapidly without special care and precision. This guide will focus on the main mode and teach players how to make a nearly invisible pathogen to take out the world. Plague Inc. Evolved: How To Win On Mega Brutal Difficulty The key is to infect as many people as possible as fast as possible before the plague is discovered. Symptoms should be avoided at all costs unless their pathogen is discovered, then players need to unlock as many infection spreading symptoms as possible. Once the player has infected everybody, or at least most of the population, then they can start adding in deadly symptoms. If the player adds in deadly symptoms too fast then the infected will all die before everybody could be infected. The top three symptoms to spread the disease are coughing, sneezing, and vomiting. Together, they make a combo called projectile vomiting that spreads the pathogen even further. The top three deadly symptoms are total organ failure, coma, and dysentery. These symptoms have proven to take out people rapidly and are best saved for when 80% or more of the population is already infected. The next thing players need to do is to upgrade resistances, especially the drug resistances. These will heighten the effectiveness of the pathogen and will pave the way for other resistances that can slow down cure research or even reverse it. The temperature resistances are useful early on in the game when the player's main focus is infection. With bacteria, there's also a generalized climate shell they can use. Players do need to be careful, though, when enabling certain items while having the virus type as their plague because it will cause the virus to mutate symptoms and that can be a bad thing if it's still the beginning of the game and the virus needs to spread quietly and quickly. Symptoms will need to be deactivated and that costs DNA points with viruses. Loud and fast symptoms are a really bad idea when playing in the mega brutal difficulty because it will be detected fast and cured fast. To beat the game in mega brutal mode, players will need to start their plague out silently and develop resistance quickly, then immediately start going deadly once the whole population is infected. Spread the pathogen quickly, then evolve it to become deadly. Mega brutal difficulty has its name for a reason, and the game is relentless in trying to make sure the player fails. But if players follow these tips, their pathogen might just have a chance and they'll rise up to a rank in which few people share. If the players follow these tips and tricks they'll be able to say that they beat Mega Brutal Difficulty on Plague Inc.: Evolved. Next: Dead Island Rip tide: Tips And Tricks For New Players Plague Inc.: Evolved is available on PlayStation 4, Xbox One, Nintendo Switch, Android, Classic Mac OS, Windows, Linux, and Macintosh Operating Systems. WRC 9 Review: It's Time To Rally Again Related Topics About The Author Aura (8 Articles Published) More From Aura Plague Inc: The cure mode guide. Answer: I have never played it on Brutal!
